

—■— local labels only —●— site acceptance test -▲- robust variant ◇ development prior only (0 labels)

1200 runs of the standard tier; each held-out site plays the new site, with the prior built from the other folds only. Labeled samples drawn at random from the site's test patches (200 draws per run and size). Accept if $P(\text{AUROC} \geq \text{target}) \geq 0.95$ (local only: one-sided 95% bound $\geq$ target).
